

## ALTER THE TRAJECTORY OF YOUR IT CAREER

**Offering the best ROI in Illinois**—and as the only tech-focused university in Chicago—Illinois Tech offers a Master of Information Technology and Management program that produces real-world problem-solvers.

Graduates enjoy high placement rates in fields with promising outlooks. Ignite your passion for technology and leadership, and develop marketable skills that companies are looking for. You'll be ready to help organizations manage their technology and their people.

### SPECIALIZED CURRICULUM SETS YOU APART

With nine specializations, our program lets you customize your degree and focus on what you want to learn. Our curriculum evolves based on real-world relevancy—and is taught by faculty with boots on the ground—to keep you at the forefront of IT, management, policy, and leadership.

### TOP PARTNERSHIPS AND RANKINGS GIVE YOU A BOOST

To hone your skills and keep you competitive, we partner with Microsoft, Oracle, VMware, and CompTIA. The skill level of our graduates has earned us a National Center of Academic Excellence designation from the NSA and Homeland Security. Earn a master's degree from one of the top-ranked U.S. IT programs.

### IN CLASS OR ONLINE— THE CHOICE IS YOURS

Attend classes on our thriving campus or online. The experience is the same no matter which option you choose. You can also shift back and forth between live and online coursework as your needs and schedule change.

"To this day, the material I learned in the introduction to networking class is material I use every day. The ITM program allowed me to grow and become a system administrator, which I never imagined I would be doing. The background I gained in ITM has allowed me to enter new areas of research, such as IT orchestration/automation and augmented and virtual reality applications."

—JEREMY HAJEK, ALUMNUS '04, '07 + ILLINOIS TECH FACULTY, CHICAGO
